

Telenational Communications

International Call Solutions for the U.S. Military.

Callback Rates

To determine the rates you will be charged for callback you will need to add together both parts of the call.

Find the country you will be calling from and write down the rate.

Find the country you will be calling to and write down the rate.

Add these two amounts together and you'll have the amount per minute to make the call.

There may be multiple listings for the same country. Be sure to select the entry that applies to you. Please note there are many countries with "special" area's or call types that have higher prices. Since it is impossible to have a current list of these areas in any printed list, please check the price before calling a new number or country.
